THE PROBLEM

253 Million

Visually Impaired People Worldwide

Yet most AI tools are completely unusable without sight.

0 AI tutors built for VI students

1 in 7 people have vision impairment

What visually impaired students face:

Cannot use most study apps

Interfaces rely entirely on visual interaction — buttons, menus, drag & drop

No personalised AI tutor

Generic chatbots give the same answer to everyone regardless of grade or topic

Voice tools are too basic

Existing tools just read text aloud — no teaching, quizzing or adaptive learning

Miss critical exam reminders

No AI tool reads their timetable & sends reminders at the right time

Language & accessibility barriers

Most tools work only in English with no font/spacing controls for dyslexia

DYSLEXIA — THE HIDDEN CHALLENGE

1 in 5 students has dyslexia — yet almost no AI tool supports them.

700M+

People worldwide have Dyslexia

1 in 5	students is dyslexic
80%	of all learning disabilities
3–7×	slower reading speed

What Dyslexic Students Struggle With

Dense, small-font text	— Standard apps use 12–14px fonts with tight spacing — causes letter blur
Letters that look the same	— b/d, p/q, m/n confusion — no tool corrects for this visually
Reading fatigue	— Long lessons become exhausting — no audio alternative provided
No dyslexia-friendly font	— Standard fonts increase confusion — OpenDyslexic is rarely supported

OUR SOLUTION

Meet SARA — Not just a chatbot. A complete AI companion.

AI Teacher

4-step structured lessons for any topic, any grade

Email Reminders

AI reads timetable & sends real exam alerts via email

Agentic AI

Autonomously plans, tracks and adapts to each student

8 Languages

Hindi, Tamil, Telugu, French, Spanish & more

100% Voice

30+ commands — complete control without a screen

Accessibility

Visually Impaired mode, Dyslexia mode, full font & spacing controls

Single HTML file • No server • No installation • Free forever • Works on any browser

LESSON: THE FRENCH REVOLUTION

I'm so excited to teach you about the French Revolution.

1. Introduction

Imagine you're living in a country where the king has all the power and you don't have any say in how things are run. This is what life was like in France before the French Revolution.

2. Main Explanation

In the late 1700s, France was ruled by a king named Louis XVI. He was very rich and lived in a big palace, but many people in France were very poor and unhappy. They didn't have enough food to eat or clothes to wear. They wanted a say in how the country was run, but the king wouldn't listen to them. This led to a lot of anger and frustration among the French people. They started to think about overthrowing the king and creating a new government where everyone had a voice. This is called a revolution. The French Revolution was a time of great change and upheaval in France. Many people were killed, and the king and queen were eventually executed. The revolution led to the creation of a new government, where power was given to the people.

SARA AI vs Normal AI Chatbot

Normal AI Chatbot	vs	SARA AI
Just answers questions typed by user		Teaches, plans, analyses & acts autonomously
Forgets everything the moment you close		Tracks all quiz scores, weak topics & progress
Cannot be used without seeing the screen		100% voice controlled — zero screen required
No accessibility features		VI mode, Dyslexia mode, font & spacing controls
English only — no language switching		8 languages: Hindi, Tamil, Telugu, French & more
No scheduling or reminder system		AI reads timetable & sends real email reminders
Generic answers for everyone		K-12 curriculum-aware, grade & board specific

RESPONSIBLE AI DESIGN

Built with Responsible AI at its Core

We also ensured responsible AI design, focusing on **privacy, fairness, safety, and inclusion.**

No student data is stored on any server — all personalisation happens locally in the browser.

WHAT'S NEXT — SARA VERSION 2

The next chapter of accessible education.

v2

SARA AI — Coming Next

Braille Support

Full Braille output integration for Braille displays — every lesson, quiz and response accessible via touch.

Teacher Dashboards

Dedicated dashboards for teachers to track student progress, scores and learning gaps in real time.

Offline Learning

Full offline mode — students in low-connectivity areas can access all lessons and quizzes without internet.

🎯 *Next, we plan to expand SARA AI with Braille support, teacher dashboards, and offline learning to make accessible education reach even more students.*
